H1.3 → Dr. Alana Berg, ND (Class of 2005)
H3.3 → Alumni Magazine Issue No. 27 – Summer 2020

H1.1 → Inspiring Healing in Others
H3.1 →

Dr. Alana Berg, ND (Class of 2005), on regaining her health and inviting others to do the same.

It took Dr. Alana Berg, ND, over 10 years until she was ready to document her personal story of healing. Deeply interested in nutrition and health from a young age, her relationship with naturopathic medicine began in her second year of university and some years later, intensified further after she was diagnosed with Multiple Sclerosis following the birth of her first daughter.

It was a difficult time as she struggled with her health, but over the years Alana became brave enough to allow herself to be vulnerable. The result was her book, *The Courageous Cure*, published in 2018.

"I'm sure other practitioners can relate – we get very used to not talking about ourselves because we're in the business of helping other people," says the Class of 2005 graduate. "It was a big process for me to actually reveal what I had to go through, how I overcame it and what I learned."

In *The Courageous Cure*, she shares her message with others who are living with their own health challenges and invites readers to explore and reflect on their own needs and well-being. It's divided into two parts: the first half of the book examines, in painstaking detail, the root causes of disease such as genetics, trauma, toxicity, nutritional deficiencies and so on. The latter half concerns the different layers of healing – physical, emotional, energetic, mental and spiritual – and how each is involved in the recovery process. Alana also included many examples from her practice throughout.

"I wrote the book to be accessible; I wanted it to be easy to read for any person that was seeking healing and act as a reference tool with a lot of information. Most of all, I wanted it to be captivating and have patient stories, to show familiarity that others could identify with," she explains.

Alana spent nearly one year writing the book, and then another to edit, format and self-publish. With a full-time practice and two young children, finding the time took some juggling and discipline. On her one day off per week, she carved out a three-hour window dedicated solely to writing.

Along the way, she enlisted the help of a book coach, copy editor, developmental editor, graphic designer, photographer, marketing professionals and peer reviewers. There are pros and cons to self-publishing, but most importantly for Alana, she could move forward at her own pace.

"We all have to recognize that time is our most valuable currency. Acknowledging what you can do and what you can't do, and then finding help when you need it, is where you need to spend energy," she says. "It's definitely more work to self-publish, but it gives you more control."

Her efforts have certainly not gone unnoticed. The community has shown "overwhelming support," she says, starting with a book launch in October 2018. Around 200 people attended the event, which also featured live music and guest speakers. In addition, she has seen an increasing number of new patients at her practice, Axiom Health Clinic in Kelowna, B.C., who read her book and related to her words. As well, she is continually asked to participate in speaking engagements, including a TEDx Kelowna event in November 2018.

"I've been practising for almost 15 years, and I use a lot of different tools with my patients. I try to be thorough in all the different ways we can approach a health condition. In my book, I outline the roots of why people are sick and some of the options that are available, because there are so many unique examples of patient journeys. I don't say, 'This is what you have to do.' I say, 'These are the things that we need to look at.' That resonates with people."

But the written word is not the only way to tell a story. In the fall of 2020, Alana plans to release an audio version of *The Courageous Cure* that will include some extra content not found in the printed book.

"I enjoy writing, that is actually the easiest part for me. But there are many ways that you can get information out there, like audiobooks and podcasts, depending on your skills and what you feel called to do."

The profession benefits when NDs pass on their knowledge, in whatever form that may take. To that end, Alana encourages all NDs to keep building the foundation of naturopathic knowledge by exchanging ideas, sharing information and continuing to grow as individual practitioners.

ND Career Opportunities

More than 20 per cent of all NDs practising in North America are graduates of CCNM. Whether it's opening a private practice, partnering with a team of NDs, or pursuing a more integrative approach to medicine with other health-care professionals in a multidisciplinary setting, graduate success has many paths that CCNM helps support.

Practice Opportunities

CCNM is not responsible for the content of these postings. Any questions about an individual practice opportunity should be directed to the contact person(s) indicated within the posting. Please note that the review process to approve practice opportunities may take up to five business days. Listings are sorted in ascending order by start date.

Preceptorships

Preceptoring is a component of the ND program that allows students to observe health-care practitioners in the community. The goal of the preceptor program is to give CCNM students a wide variety of experiences in different health-care settings in order to develop the clinical knowledge, attitudes and skills relevant to the role of a naturopathic doctor.

For more information, contact the office of clinical education:
(416) 498-1255 ext. 241 | oce@ccnm.edu

Become a Preceptor

Remember when you were a student and gained valuable clinical knowledge from practising NDs? Now you can share your clinical knowledge and experience with tomorrow's NDs. Become a preceptor and share a transformative relationship with a CCNM student today!

Benefits of hosting a CCNM student for preceptorship:

✓ Provides exposure to potential future associates

✓ Stimulates practice innovations and improvement through exposure to new approaches in assessment and patient management taught at CCNM

✓ Provides CE credits for NDs registered in the province of Ontario

✓ It's enjoyable!

*Preceptors need to perform 30 hours of preceptoring (hosting) on an annual basis in order to be eligible for ongoing benefits.

Residency Opportunities

CCNM is committed to providing high quality postgraduate residency experiences for a limited number of qualified graduates from Council on Naturopathic Medical Education (CNME) accredited naturopathic medicine programs. The residencies consist of increasingly independent clinical experiences, research opportunities, structured mentoring, and advanced clinically focused curriculum components.

For information on CCNM residencies and affiliate sites, please contact:

Dr. Jasmine Carino, ND, Associate Dean of Curriculum and Residency
(416) 498-1255 ext. 301 | jcarino@ccnm.edu

CCNM Clinical Residency Toronto, Ontario Number of positions: 3 The role is a two-year residency program at CCNM. There are three positions available, and the start date is fall 2019. Key features of the residency include: - Assisting in the clinical training and supervision of interns at the Robert Schad Naturopathic Clinic (RSNC) and at satellite clinics - Being a teaching assistant/small group facilitator for selected courses - Participating on at least one College committee - Completing an approved research project by the end of each residency year - Engage in student evaluations including Objective Structured Clinical Examinations (OSCEs) - Supporting the biannual file audit process for the RSNC - Develop and maintain a private clinical practice (4 hours/week in the first year) - Performing other duties as assigned by the Associate Dean, Curriculum and Residency Program East Coast Naturopathic Clinic Residency Bedford, Nova Scotia Number of positions: 1 The role is a two-year residency in Bedford, Nova Scotia in a busy clinic that houses two NDs and two naturopathic residents currently. Patients with a spectrum of concerns come to the clinic, with a focus on chronic Lyme/infections, integrative cancer care, chronic pain, autism spectrum disorder, and neurological disorders. Key features of the residency include: - Resident-patient interactions - Research activities - Practice management - Continuing education - Mentorship Integrative Cancer Centre Residency Toronto, Ontario Number of positions: 1 This position is ideal for a naturopathic medicine graduate who has a specific interest in cancer care and research. The role is a two-year residency program at the Integrative Cancer Clinic (ICC) located within the Canadian College of Naturopathic Medicine endorsed by American Board of Naturopathic Oncology (ABNO). There is one position available with a fall 2019 start date. Key features of the residency include: - Assisting in the clinical training and supervision of interns at the Integrative Cancer Centre (ICC) - Participating in patient care at the ICC - Engaging in public educational talks on the topic of naturopathic integrative oncology - Supervising the patients receiving infusion therapy - Completing an approved research project - Oncology rotations at Sunnybrook, Southlake Regional Hospital, and Markham-Stouffville - Performing other duties as assigned by the Director, Integrative Cancer Centre	Marsden Centre of Naturopathic Excellence Residency Maple, Ontario Number of positions: 1 This position is ideal for a naturopathic medicine graduate who is strong in the human biology sciences and wants focused training in managing patients with cancer, environmental concerns, and using infusion therapy. This residency is a two-year residency program with one position available. The start date is in fall 2019, contingent on the resident being parenteral-certified. Key features of the residency include: - New patient assessment with focus on case management occurring in the second year - Initiating and monitoring naturopathic infusion therapy - Managing inventory related to infusion therapy - Managing lab services both in-house and out of house - Propose two research or outreach projects and plan for deployment including, if needed, determining funding sources - Developing and deploying public and inter-professional education program on the topic of naturopathic therapies, cancer prevention, treatment and the role of environment in disease - In Year 2, the resident will present at MCNE continuing education seminar series. Ottawa Integrative Cancer Centre Residency Ottawa, Ontario Number of positions: 1 This position is ideal for a naturopathic medicine graduate who has a specific interest in both cancer care and research. Expectation is that the resident will be parenterally trained by the start of the residency, and demonstrate interest in research, ideally with a publication history. The role is a one-year renewable residency program at Ottawa Integrative Cancer Centre (OICC). There is one position available, and the start date is fall 2019. Key features of the residency include: - Participating in consultative clinical care of oncology patients - Providing parenteral therapy support and training - Conducting synthesis research - Providing case management for patients on the cancer journey - Developing expertise in oncology through mentorship through onsite practitioners - Being involved in community outreach and education - Involved in the development and conduct of clinical trials - Engaging in the conduct and development of clinical trial and observational research - Participating in oncology-focused CE development to be provided internally at the OICC and available externally for the ND profession - Being involved in other team building, research, and clinical duties as assigned by the Director of OICC

How To Apply

Please visit the [AANMC website](#) for registration, application process and application forms.

The following is a calendar overview of the resident selection process.

Timelines

March 23, 2020
Start of the interview period

July 15, 2020
Deadline for a site to withdraw and notify the AANMC and school residency director

July 31, 2020
End of the interview period

August 19, 2020 (8 p.m. EST)
Match day (sites are informed of the results by their school residency administrator soon after these are published by the AANMC)

August 12, 2020 (8 p.m. EST)
Deadline for sites to submit list of final selection(s) to their school residency administrator for the match. Students will upload their selections via the match portal.

Please Note:
Applicants can only list in their ranking those sites for which they were interviewed and willing to accept the residency position if matched, regardless of the listed rank. Also, residency sites will only list in their ranking, those residents they would be willing to accept, regardless of the listed rank.
